

# H<sub>2</sub>O-KDF/GAC PLUS

## Product Overview

The H<sub>2</sub>O-KDF/GAC PLUS filter is a 5,000 gallon capacity **advanced unique proprietary cartridge** that only fits our housing (H<sub>2</sub>O-RCT-CP), as well as other housings with the use of a removable spacer. The cartridge also comes with two exchangeable sediment filter rings that prolong the life of the cartridge by stopping particles from clogging the internal sediment pad. Granular coconut shell activated carbon (GAC) and KDF 55 process media are combined in this cartridge to reduce chlorine, organic volatile compounds (VOC) and other pollutants that cause bad taste, appearance and odor in tap water. The value of this cartridge resides in its unique size and housing which ensures customer retention.

With the use of the spacer this cartridge can be used in any industry standard 10" filter housing.

H<sub>2</sub>O-RCT-CP

H<sub>2</sub>O-KDF/GAC PLUS fits any 10" cartridge housing and can be used in our proprietary size cartridge in the H<sub>2</sub>O-RCT-CP Countertop

Spacer allows this cartridge to fit any standard 10" housing

Replaceable Sediment Pre-filter. This cartridge is supplied with two pre-sediment ring filters.

H<sub>2</sub>O-KDF/GAS PLUS Replaceable Cartridge
