STRUCTURAL® BAJONET® DISTRIBUTION SYSTEMS

Pentair® Structural® Bajonet® Distribution Systems for composite tanks feature chemical and impact resistance for a variety of applications. Unique ¼ turn, cam-lock hubs and laterals make assembly and installation easy and secure. With proper underbedding, the unique slot design assures a uniform, vertical distribution of flow, and less than 5 PSI pressure drop at designated flow rates. These systems will operate at temperatures up to 120°F.
